

1. Brainstorming & Ideation Phase

FITBUDDY – AI FITNESS PLAN GENERATOR USING GEMINI MODELS

- Project Title: FITBUDDY – AI FITNESS PLAN GENERATOR USING GEMINI MODELS
- Project Overview: FitBuddy is a web-based application designed to generate personalized fitness plans using Generative AI. The system accepts user fitness information and generates a structured 7-day workout plan with nutrition and recovery guidance.
- Problem Statement: Users often receive generic workout advice that does not consider their individual goals, fitness level, preferred intensity, or feedback. FitBuddy addresses this by using AI to create adaptable, personalized plans.
- Objectives: Generate personalized 7-day workout plans; provide nutrition and recovery tips; accept feedback and update plans; store user and plan information; provide an administrator view of users and generated plans.
- Proposed Solution: Combine a FastAPI web application, Google Gemini models, HTML/CSS/Jinja2 templates, SQLite, and SQLAlchemy to provide an end-to-end AI fitness planning system.
