

8. Project Demonstration Phase

FITBUDDY – AI FITNESS PLAN GENERATOR USING GEMINI MODELS

- **Demonstration Flow:** Introduce the FitBuddy problem and objectives → show the project interface → enter sample user information → generate a 7-day plan → show nutrition/recovery guidance → submit feedback → demonstrate the updated plan → show stored data/admin view → explain technology stack.
- **Demonstration Materials:** Project presentation, screenshots, application walkthrough, source-code repository, test results, and project documentation.
- **Repository References:** AI/ML & Gen-AI project template: <https://github.com/Ravi-teja-777/AI-ML-and-GEN-AI-Track-Project-Template> ; FitBuddy project repository: <https://github.com/Monica-debug-int/fluffy-palm-tree>
- **Presentation Notes:** Explain the project in terms of the problem, solution, architecture, AI integration, database, major features, testing, and future improvements.
- **Future Enhancements:** More detailed personalization, progress tracking, richer analytics, improved authentication, additional AI-supported interactions, and deployment to a production environment.
